Task

See if you can copy the rhythms that I clap in the Echo Clapping video. I clap first, and then you copy my rhythm in the gap afterwards. If you get really good, see if you can come up with your own patterns for your family to copy at home. The next stage on from listening and copying rhythms, is to be able to read them

and clap them. Don't forget that ta looks like this

, and te-te looks like

this . Please open the rhythm sheet above, see if you can say the rhythms and clap them.

The flash card video shows some of the same rhythms you came across in the echo clapping video. This time you need to read the rhythm to clap it rather than listen to it.
